USER'S MANUAL

MODEL: S100

Precautions

This manual contains important safe measurement and correct operational information, so please read all the information carefully before you use the device in order to avoid any unexpected accidents.

➢ Do not put the player in the condition of high temperature, humidity or dust.
➢ Do not put the player in high temperature place (over 40℃), especially not in the cars with window closed in summer.
➢ Do not knock or hit the player, especially do not shake TFT screen to avoid TFT being damaged or displayed abnormally.
➢ Select suitable volume to protect your ears.
➢ Do not disconnect the player abruptly during the formatting, uploading, or downloading; otherwise, it will cause the program error.
➢ We will not be responsible for any obligation for any memory loss caused by product damage, repair or other reasons. Please always backup important files.
➢ The player will be charged once it is connected to a USB port, no matter it is powered on or not.
➢ Do not dismantle the player personally as it will void the warranty and it might cause personal injury. Do not use alcohol, thinner or benzene to clean the surface of the player.
➢ Do not use the player in the electronics-prohibited area, such as in the airplane.

Specifications

MP3 Player Type	Flash Memory Based, SD Card Expandable
Display	Large 3"QVGA, 400x240 Pixels Resolution, 16 Million Colours, 16:9 LTPS TFT Screen.
Capacity	4GB Expandable

Colour	Black
Weight	45.000g
Dimensions	93×47×10mm
Accessories	Earphone, Mains Charger, USB Lead. Software and Manual Downloadable.
Compatible OS	Windows2000/XP/vista

Charging and the Battery Performance

The Player can either be charged by Connecting the USB cable to your PC, or
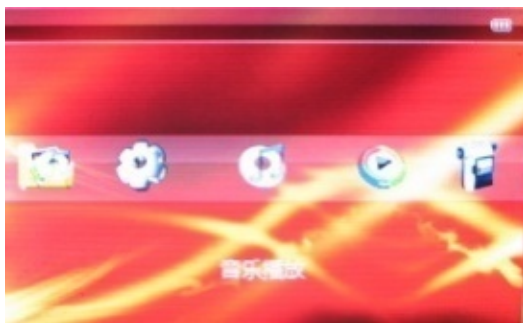

a 5V, 500mA Mains adapter

The Player is charging

📝 **Note:** To get a better battery life, Please slide the power button to ON and charge the new player for concessive 5 hours (no more than 8 hours) for the first two times, and charge it for 2~3 hours thereafter. Power saving options available from SETUP menu.

Power-on the Player

Slide the left ON/OFF button to PLAY position and Hold, Power-on Interface will show up:

Note

Please switch off the player normally, i.e., switch according to the above instruction instead of sliding the Power key to the Power OFF position directly ,otherwise any modifications to the settings will not be saved.

Organising your media files

You can connect your PC to the Player to organize digital media files

- *After connecting the player to a PC, two new Removable Device will show up in My Computer, for example E:\ and F:\ Drive. One of them(E:\) will be the player's Built-in Memory, the other(F:\) will be the player's Memory Card.*

- *Double Click the new drive to enter, Simply Copy the media files in your PC and paste them onto the new drive. You may create as many folders as you like. For example a folder called Music and a folder called Video.*

- *Do not put too many files into a single folder as it takes a long time to seek files.*

-

Preset Folders

There are designated folders for files to store in, for example:

__MUSIC__ folder: for keeping music files in the formats of MP3 and WMA,

__VIDEO__ folder: for keeping video files in the formats of RM, RMVB and AVI.

__PICTURE__ folder: for keeping picture files in the formats of JPG, BMP and PNG,

__FLASH__ folder: for keeping animated files in the format of SWF.

__TXT__ folder: for keeping files in the format of TXT.

__RECORD__ folder: system folder for keeping recorded voice files generated by the Player.

If any file is not kept in its corresponding folder, you will need to manually use "Browse ALL files" Menu.

Use of Expansion Card:

Please insert and pull a SD Card when power is off! Otherwise, it may lead to loss or damage to the files in the unit!

Use of an SD Card may reduce battery life as it needs power to read the information from the card.

Keys Switches and Interfaces

This player contains 5 TOUCH CONTROL keys and 1 switch

A: fast forward/next track,

B: rewind/previous track, or **exit / return** to previous upper main menu

Troubleshooting

FM radio channels unable to work normally

Since there is no independent antenna, the MP4 uses the connected earphone to receive FM radio signals. There are also wrong setting that caused the problem: Check if the reception sensitivity and Radio Zone are correctly set.

Unable to switch on the player

Check if the machine if charged

Check if the HOLD button is enabled

Try to reset the player if possible if everything fails.

Battery does not last as long as expected

There are many factors to reduce battery life. Check if you have the power saving methods (e.g. Screen off time) set up in the settings menu. External speaker, playing video, use of a memory card are also major factors losing power quickly.

Noise in playing.

The damaged music file or impurity of the earphone jack may cause the problem; so is the loose connection

Unable to download file

Check if the computer and the player are properly connected.

Check if the memory is full.

Check if the USB cable is damaged.

Unable to Charge

Check if the power button is turned to ON position to allow charge

Check if the mains adapter is faulty or in the wrong voltage.

Check if the connecting USB cable is faulty.

SD Card not recognized by the player

Make sure the card is within the maximum allowed size

Check if the player is compatible with SDHC cards

Check if you have enabled the card in the settings, reboot the machine if needed.

Check if the card is fake or faulty.

Strange characters found on the machine after resetting the machine.

It should be foreign language set by the default..The language options should be found in the setting menu.

If you are not able to resolve your problem, contact the technical support for information about how to obtain personal assistance from us or your local retailer.
